EDUCATION & CERTIFICATIONS

THE ODIN PROJECT

Full Stack Web Development (JavaScript Track)

Completed 2025

Completed: JavaScript, Node.js, React, Testing, Databases, Deployment

GOOGLE CYBERSECURITY PROFESSIONAL CERTIFICATE

Google & Coursera

Coursera

CISCO NETWORKING ACADEMY

Cybersecurity, Network Defense, Endpoint Security, Networking Devices & Initial Configuration

CBSE SENIOR SCHOOL CERTIFICATE (12TH)

TECHNICAL SKILLS

Programming: JavaScript (ES6+), TypeScript, Python, C, HTML5, CSS3

Frameworks & Libraries: React, Next.js, Node.js, Express.js, FastAPI, Framer Motion

Databases: PostgreSQL, MongoDB, SQLite, Redis

DevOps & Tools: Git, GitHub Actions, Docker, Linux (Arch), CI/CD, Bash, VS Code, Wireshark, npm, pnpm

Security: SIEM (Microsoft Sentinel), ISO 27001, NIST CSF, MITRE ATT&CK, Threat Analysis, Incident Response, EDR

Other: REST APIs, GraphQL, Electron, Browser Extension APIs, Technical Writing, Agile

TECHNICAL PROJECTS

P-Stream — Next.js Streaming Platform

github.com/p-stream/p-stream

- Built a full-stack streaming platform for movies and TV shows using Next.js, TypeScript, and Tailwind CSS.
- Implemented video delivery optimization, user authentication, and a fully responsive UI focused on performance and SEO.

BetterMint — Chrome Extension

github.com/BotSolvers/BetterMint

- Published a Chrome extension enhancing Chess.com analysis features, led frontend UI/UX, and managed releases on the Chrome Web Store.
- Handled user feedback and iterative updates to improve analysis features and browser compatibility.

Chessist — Live Evaluation Bar

github.com/lurimous/Chessist

- Developed a live evaluation bar for Chess.com and Lichess powered by the Stockfish engine using JavaScript and Web APIs.
- Implemented real-time analysis and ensured cross-browser compatibility for Chromium-based browsers.

Sonosano — Desktop Music Archiver

github.com/KRSHH/Sonosano

- Built a cross-platform desktop music preservation and archiving app using Electron and TypeScript targeting Windows, macOS, and Linux.
- Designed the UI and managed the build pipeline for multiple OS targets.

STORM Research Assistant

github.com/Divviyanshu/STORM-Research-Assistant

- Implemented Stanford's STORM methodology for AI-generated long-form research articles using Python, LangGraph, and trusted web sources.
- Built a multi-perspective conversation system for automated research content generation.

QDL — Open Source Contributor

github.com/linux-msm/qdl

- Contributed to a Qualcomm firmware flashing tool written in C, patching USB communication logic and adding cross-compilation support.

PROFESSIONAL EXPERIENCE

Incident Management & Governance

Jul 2025 – Sep 2025

- Developed three incident response playbooks (Phishing, Malware, Suspicious Logins) with escalation procedures aligned to ISO 27001.
- Built Microsoft Sentinel dashboards to visualize incident metrics and compliance readiness.

Endpoint Security Assessment

May 2025 – Jun 2025

- Performed endpoint security evaluations using open-source EDR tools on Windows and Linux in controlled lab environments.
- Documented IoCs, impact analysis, and remediation plans using the incident response lifecycle framework.

Network Traffic Monitoring

Mar 2025 – Apr 2025

- Analyzed network traffic for anomalies and potential threats using Wireshark and firewall tools.
- Delivered firewall policy and logging improvement recommendations aligned with governance and compliance standards.

ADDITIONAL INFORMATION

Languages: English (Professional), Hindi (Native)

Interests: Full Remote, Hybrid, or Hyderabad-based roles
